

Rental Solutions

Keeping you up and running

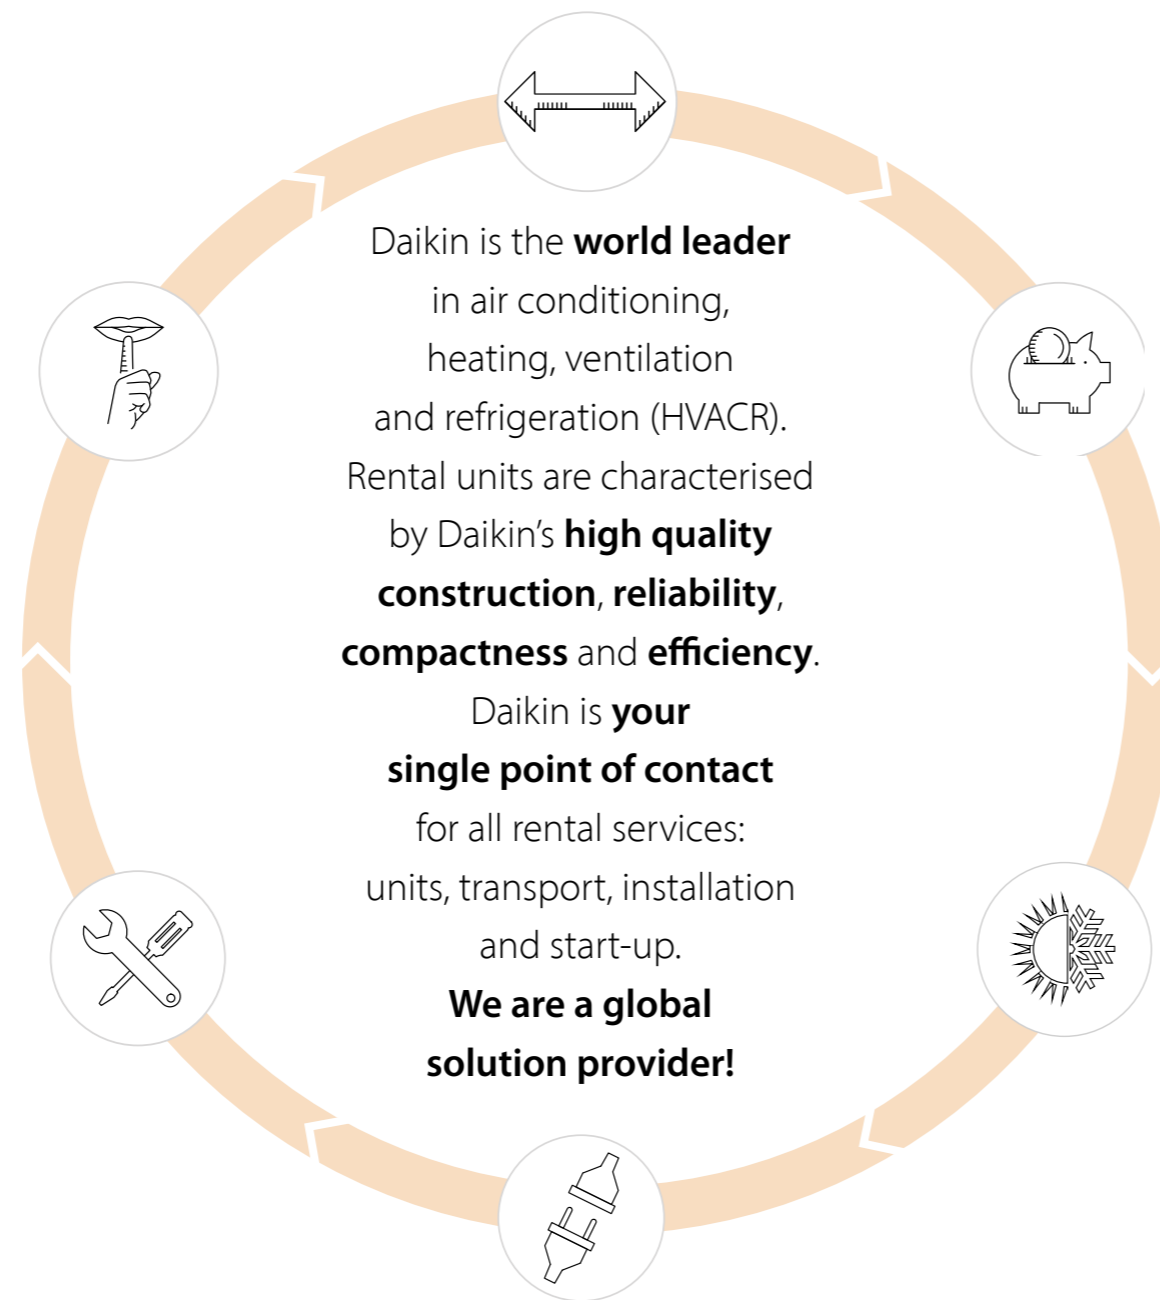

Daikin Rental Solutions offers Chillers, Heat pumps, Air Handling, and Power, along with active remote monitoring as standard on every unit. Meet your temporary cooling needs whilst reducing CAPEX and optimising your OPEX.

Why use Daikin Rental

Daikin Rental Solutions offer a wide range of services to our business clients. Daikin and partners stock most capacity units. If the requested unit is not available, Daikin commits to find the suitable solution for you.

Seven reasons to use Daikin Rental Solutions

- 1. Daikin on Site, active remote monitoring as standard on every unit**

Achieve the highest reliability, efficiency levels and system lifetime. Eliminate downtime or delays for alarm troubleshooting. Also benefit from a Daikin expert to monitor your plant, analyse your energy consumption, and suggest actions and system improvements.
- 2. Vastly minimise downtime with a contingency plan**

A Daikin Rental specialist will visit your site to help you plan your HVAC contingency.

 - Site survey
 - Identification of failure points
 - Enabling works
 - Rapid response strategy
- 3. Solutions for cooling emergencies**

Whether a natural disaster or an equipment failure takes your cooling system down, Daikin temporary cooling can get you up and running again fast!
- 4. Standby cooling for critical applications and processes**

A temporary cooling system is sometimes used to back-up manufacturing, and chemical processes, or when a hospital's system redundancy has been reduced.
- 5. Special events**

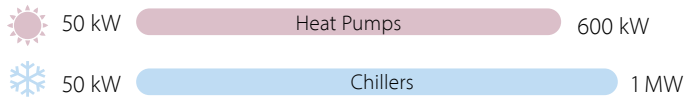

We can support you with creating a comfortable climate for your special events by putting together the right equipment for your specialty cooling requirements.
- 6. Solutions for cooling load fluctuations**

A simple rental solution ensures the correct load and energy efficiency while the facility expansion is being finalised, or during seasons of extreme weather temperatures.
- 7. Cooling supply during planned shutdowns and outages**

During planned equipment maintenance, retrofit, renovation, or replacement, a rental solution will alleviate system downtime and the time pressure to get your primary cooling system back on line. This way, the work can be completed correctly the first time, and avoid costly overtime.

Daikin Rental offers **turnkey solutions**, undertaking delivery, assembly and connections of the plant, as well as start-up and monitoring.

Wide operating range

Acoustic comfort

- › Extra-low noise versions: compressor soundproofing
- › Modulating fans

Low operating costs

- › Heat pumps: SCOP up to 3.65
- › Chillers: SEER up to 5.03

Rapidity of intervention

- › Remote monitoring as standard
- › Daikin engineers on hand nationwide
- › Accessories for "plug & play" installations

Flexibility of application

- › **Hot water** produced up to +60°C
- › Heating up to -15°C outside air temp
- › **Chilled water** produced down to -13°C
- › Air conditioning up to 43°C outside air temperature

Reliability

- › Remote monitoring as standard on every unit
- › Units with multiple circuits and multiple compressors
