Why use Daikin rental solutions?

Daikin Applied Service UK offers a wide range of services to our business clients. In the next page we have listed the services that we offer to our clients along with a brief description. Daikin and partners stock most capacity units. If the requested unit is not available, Daikin commits to find the suitable solution for you.

Six reasons to use Daikin Rental solutions

1. **Daikin on Site, a solution for customer specific needs**

Your cooling unit will reach high reliability and efficiency levels. No more stops and long waiting time for alarm troubleshooting. Thanks to a continuous monitoring and advanced tools, Daikin on Site helps to improve the overall system lifetime. A Daikin expert is ready to help and keep monitoring your plant, analysing your energy consumption, suggesting actions and system improvements.

2. **Solutions for cooling emergencies**

Whether a natural disaster and/or an equipment failure takes your cooling system down, Daikin temporary cooling can get you up and running again fast!

3. **Standby cooling for critical applications and processes**

A temporary cooling system is sometimes used to back-up manufacturing, and chemical processes, or when a hospital's required system redundancy has been reduced.

4. **Special events**

We can support you with creating a comfortable climate for your special events and parties by putting together the right equipment for your specialty cooling requirements. Quick and easy solutions for fairs, trade shows, festivals, events in temporary structures, etc.

5. **Solutions for cooling load fluctuations**

During facility expansions there is a need to test equipment and process areas but not sufficient load to keep new or large chillers running. A simple rental solution ensures the correct load and energy efficiency while the expansion new build is being finalized.

6. **Cooling supply during planned shutdowns and outages**

Daikin temporary cooling is an excellent way to supply cooling during planned equipment maintenance, which elevates the time pressure to get your primary cooling system back on line. This way, the work can be completed correctly the first time, and avoid costly overtime. In addition to the cooling solutions, we also have the same rental solutions available for heating.

Daikin temporary cooling makes it possible for your facility to maintain full cooling capabilities during retrofit, renovation, or replacement

Daikin Rental Solutions undertake the delivery, assembly and connections of the plants as well as start-up. Rent carefree, rent Daikin.

Wide range of unit capacity

High seasonal efficiencies:

Operating costs reduction

- › Heat pumps: SCOP up to 3.65
- › Chillers: SEER up to 5.03

Acoustic comfort

- › Extra-low noise versions: compressor soundproofing
- › Modulating fans

Rapidity of intervention

- › Extensive presence of service centres
- › Accessories for “plug & play” installations

Reliability:

- › Remote monitoring
- › Units with multiple circuits and multiple compressors

Wide operating ranges:

Flexibility of application

- › **Hot water** produced up to +60°C
- › Heating up to -15°C outside air temp
- › **Chilled water** produced down to -13°C
- › Air conditioning up to 43°C outside air temperature
